ROLES & RESPONSIBILITIES

A web designer creates the look, layout, and features of a website. The job involves understanding both graphic design and computer programming. Once a website is created, a designer helps with maintenance and additions to the website. They work with development teams or managers for keeping the site up-to-date and prioritizing needs, among other tasks.

> Conceptualizing creative ideas with clients.
> Testing and improving the design of the website.
> Establishing design guidelines, standards, and best practices.
> Maintaining the appearance of websites by enforcing content standards.
> Designing visual imagery for websites and ensuring that they are in line with branding for clients.
> Communicating design ideas using user flows, process flows, site maps and wireframes.
> Incorporating functionalities and features into websites.
> Designing sample pages including colors and fonts.
